Education

Vellore Institute of Technology <i>Bachelor of Technology – Computer Science and Engineering</i> Cumulative GPA: 8.64 / 10	Bhopal, Madhya Pradesh, India September 2023 – Present
Indian Institute of Technology Madras <i>Bachelor of Science in Data Science</i>	Online / Remote Learning Mode, India Present
D.A.V. International School <i>Class 12th (CBSE)</i> Percentage: 85.4%	Amritsar, Punjab, India April 2022 – April 2023
D.A.V. International School <i>Class 10th (CBSE)</i> Percentage: 93%	Amritsar, Punjab, India April 2020 – April 2021

Technical Skills

Languages: Java, Python, HTML, CSS
Frameworks/Libraries: Spring Boot, React, OpenCV, MediaPipe, Pandas, NumPy, Matplotlib
Databases: MySQL
Tools: Git, GitHub, Maven, IntelliJ IDEA, VS Code, Jupyter Notebook
Core Concepts: Data Structures and Algorithms, OOPs, REST APIs, JWT Authentication, ML, Computer Vision

Experience

Web Development Intern <i>InAmigos Foundation</i> - Developed responsive web pages using HTML and CSS with a focus on clean design and usability. - Designed and implemented user-friendly layouts, navigation menus, and interactive webpage components. - Customized website content and styling to meet project requirements and enhance user experience. - Collaborated with the development team to deliver web solutions within project deadlines.	May 2026 – May 2026
--	---------------------

Projects

FocusLock – Full-Stack Productivity Platform (Ongoing) <i>Java, Spring Boot, Spring Security, JWT, MySQL, React, JavaFX</i> - Developing a full-stack productivity application with secure JWT authentication and RESTful APIs using Spring Boot and MySQL. - Designed a scalable backend architecture with focus session management, block target management, emergency unlock functionality, and token-based authentication. - Developing a React dashboard for managing focus sessions, block targets, and productivity insights. - Currently integrating a JavaFX desktop agent for real-time website and application blocking.	<i>GitHub</i>
House Price Prediction using Machine Learning <i>Python, Pandas, Scikit-learn, XGBoost, LightGBM, Matplotlib, Jupyter Notebook</i> - Developed a machine learning pipeline to predict Bengaluru house prices using property attributes such as location, area, BHK. - Performed data preprocessing, feature engineering, feature scaling train-test splitting for model training. - Trained and compared multiple regression models including Linear Regression, Decision Tree, Random Forest, XGBoost, and LightGBM using cross-validation and evaluation metrics such as MAE, RMSE, and R² Score. - Analyzed model performance to identify the most effective algorithm for accurate house price prediction.	<i>GitHub</i>
EmoHands: AI Emotion Detection and Virtual Drawing System <i>Python, OpenCV, MediaPipe, TensorFlow, DeepFace</i> - Developed a real-time computer vision application for facial emotion recognition and virtual hand-based drawing. - Integrated webcam-based face detection, emotion analysis, and hand tracking into a unified application. - Implemented finger gesture recognition to enable drawing on a virtual canvas without physical input devices. - Applied computer vision and machine learning techniques to deliver an interactive user experience.	<i>GitHub</i>

Certifications

- OCI Generative AI Professional – Oracle (2025)
- AWS Certified Machine Learning Engineer – Associate (2025)
- The Bits and Bytes of Computer Networking – Coursera (2024)
- Introduction to Machine Learning – NPTEL (2024)
